

# Makerspace Activities

TIPS FOR ACTIVITIES FOR SCHOOL CLOSURE IN MARCH 2020

## ANIMAL HABITATS

All students love animals. The older students understand the different habitats on our planet; desert, wetlands, forest, ocean, arctic, grassland, rainy forest/jungle. Ask your child to build a home for an animal that provides food, shelter, space and water.

## FORT BUILDING

Every age knows how to build a structure using rolled newspaper tubes. Roll 3 pieces of newspaper starting at the corner going diagonally. Placing one piece of tape at the end will prevent it from unfurling. The tighter you roll the tube, the stronger it will be. See below for explanation on how to make tubes.

## USEFUL BUILDING SUPPLIES

- Egg Cartons
- TP Rolls
- Corks
- Newspapers
- Bottle Caps
- Cereal Boxes
- Paper
- Cans
